Year	2024/2025
Organization	Civil Engineering and Geosciences
Education	Schakelopleiding EnvE

Schakel Programma MSc ENV 2024

CT2023	Programmeren in Python	3
Responsible Instructor	Dr. V.L. Markine	
Contact Hours / Week x/x/x/x	2/2/2/2	
Education Period	1 2 3	
Start Education	1 2 3	
Exam Period	1 2 3	
Course Language	Dutch	
Collegerama	No	

CTB2110	Fluid Mechanics	5
Responsible Instructor	Dr.ir. T.S. van den Bremer	
Responsible Instructor	Dr. C. Chassagne	
Instructor	Dr.ir. T.S. van den Bremer	
Instructor	Dr. C. Chassagne	
Education Period	1	
Start Education	1	
Exam Period	1 2	
Course Language	Dutch	
Collegerama	Yes	

CTB2400	Numerical Mathematics	3
Responsible Instructor	Prof.dr.ir. C. Vuik	
Co-responsible for assignments	Dr.ir. D. den Ouden-van der Horst	
Education Period	4	
Start Education	4	
Exam Period	4 5	
Course Language	Dutch	
Expected prior knowledge	analysis, calculus, linear algebra, differential equations	
Parts	During the lectures the most important points are highlighted. Motivation for the various parts of the lectures/book are given. Exercises are discussed and explained. There is a lot of material available on the corresponding website for information, motivation, exercises and old exams.	
Summary	After the course the student is able to design a simple numerical method, analyses it and implement it. Furthermore, the student should be able to consider the results of numerical methods, analyse them and explain their behaviour. An oral and/or written report of these findings can be given by the student.	
Education Method	Lecture	
Tags	Mathematics Numeric Methods Programming	
Literature & Study Materials	Numerical Methods for Ordinary Differential Equations C. Vuik, F.J. Vermolen, M.B. van Gijzen and M.J. Vuik TU Delft OPEN, Delft, 2023 https://textbooks.open.tudelft.nl/textbooks/catalog/book/57	
Judgement	Grade of the written test is the final grade. For more information on grading, see article 14 in the Rules and Guidelines (RGBE): https://www.tudelft.nl/en/student/ceg-student-portal/education/education-information/educational-rules-and-regulations	
Permitted Materials during Exam	Only a standard calculator.	
Collegerama	Yes	

IFEEMCS010500	Probability and Statistics	3
Responsible Instructor	Dr. C. Kraaikamp	
Responsible Instructor	Dr. R.J. Fokkink	
Contact Hours / Week x/x/x/x	x/x/4/x or x/x/x/4	
Education Period	3 4	
Start Education	3 4	
Exam Period	3 4 5	
Course Language	Dutch English	
Expected prior knowledge	Linear Algebra, Calculus for Engineering part 1 and part 2 or Calculus for Science part 1 and part 2.	
Course Contents	Graphical and numerical summaries of data Introduction to probability Some elementary combinatorics to find probabilities Conditional probability; Bayes' rule; stochastic (in)dependence Random variables; probability mass function; density function; distribution function Standard distributions: Binomial, Poisson, Geometric, Normal, Uniform, Exponential, Pareto Expectation and variance; transformations; Jensen's inequality Multivariate random variables; joint distributions; joint and marginal density functions; (in)dependence of random variables Covariance and correlation Chebychev's inequality; Law of Large numbers; Central Limit Theorem Sampling theory and statistical models; mean, sample variance, histogram, empirical distribution function, boxplot Theory of Estimators: Bias, Efficiency, Mean squared error Linear Regression: univariate and multivariate, goodness of fit Introduction to statistical learning Confidence intervals of Mean and Proportion; t-distribution Testing theory: Type I/II Error, p-value, significance level, critical region One sample t-test	
Study Goals	At the end of the course, you will be able to: - compute (conditional) probabilities - use discrete and continuous random variables - use joint random variables - compute expectation and (co)variance - apply the law of large numbers and the central limit theorem - analyse data by means of graphical and numerical summaries - formulate a statistical model - estimate parameters - perform a linear regression analysis - construct a confidence interval - formulate and carry out hypothesis tests - Use a computer program to perform elementary simulation and data analysis	
Education Method	Interactive lectures, pre-lecture videos, exercises	
Literature and Study Materials	Book: Mathematical introduction to Probability and Statistics, Dekking et al.	
Assessment	One midterm (week 5) on Part 1: Probability Theory and one endterm (week 10) on Part 2: Statistics. Final grade is the average of both tests. To pass the course, the grade for part 2 needs to be at least 4 or higher.	
Permitted Materials during Tests	1) Formula sheet to be used for exams of Probability and Statistics 2) Any kind of calculator	
Remarks	Please note that this course is available in Q3 and in Q4.	
Co-Instructor	Dr. C. Kraaikamp	
Co-Instructor	Dr. R.J. Fokkink	

IFEEMCS012100	Calculus for Engineering, part 1	3
Responsible Instructor	Dr. E. Emsiz	
Contact Hours / Week x/x/x/x	4/x/x/x	
Education Period	1	
Start Education	1	
Exam Period	1 2	
Course Language	Dutch English	
Expected prior knowledge	See the requirements of the specific MSc programma students are applying for.	
Co-Instructor	Dr.ir. N.P.K. Chan	

IFEEMCS012200	Calculus for Engineering, part 2	3
Responsible Instructor	Dr. E. Emsiz	
Contact Hours / Week x/x/x/x	x/4/x/x	
Education Period	2	
Start Education	2	
Exam Period	2 3	
Course Language	Dutch English	
Co-Instructor	Dr.ir. N.P.K. Chan	

IFEEMCS012300	Calculus for Engineering, part 3	3
Responsible Instructor	Dr.ir. R.F. Swarttouw	
Contact Hours / Week x/x/x/x	x/x/4/x	
Education Period	3	
Start Education	3	
Exam Period	3 4	
Course Language	Dutch English	
Expected prior knowledge	Calculus for Engineering 2 (IFEEMCS012200) or a similar course.	
Course Contents	Line integrals and surface integrals. Integral theorems of Green, Stokes and Gauss. Sequences and series. Power series and Taylor series.	
Study Goals	After this course the student should be able to 1. find parametrizations of curves and surfaces (in 2D and 3D); 2. calculate a line integral or a surface integral of a function or a vector field; 3. mention the physical interpretation of these line and surface integrals; 4. define and formulate the physical meaning of concepts like gradient, curl and divergence; 5. calculate line and surface integrals via one of the integral theorems (Green, Stokes, Gauss) 6. determine whether a sequence is convergent or divergent, for example by calculating its limit; 7. determine whether a series is convergent or divergent with a test for convergence: Integral Test, (Limit) Comparison Test, Ratio or Root Test; 8. determine the interval of convergence of a power series; 9. determine the Taylor series of a simple analytic function, for example $\sin(x)$, $\cos(x)$, $\exp(x)$, $\ln(1+x)$, $\arctan(x)$, $(1+x)^a$.	
Education Method	Lectures (per week 2x2 hours).	
Books	Calculus, Volume 1, 2 and 3. Edwin Herman, Gilbert Strang. ISBN-13 978-1-947172-13-5, 978-1-947172-14-2, 978-1-947172-16-6 This is an open source book that also will be made available (for free) via Brightspace.	
Assessment	On-campus exams. Partly digital, partly written. See Brightspace for more details. There will be two partial exams, of 90 minutes each: - The first partial exam is about vector calculus; - The second partial exam is about sequences and series. The final grade is the average of the grades for the two partial exams. There is only one resit, about the complete course, that lasts 180 minutes. It is NOT possible to resit only one partial exam.	
Permitted Materials during Tests	A formula sheet (see Brightspace). NO calculators allowed.	
Co-Instructor	Dr. F.J. van de Bult	

WI1807TH1-21	Linear Algebra	3
Responsible Instructor	Dr.ir. R.F. Swarttouw	
Contact Hours / Week x/x/x/x	4/x/x/x	
Education Period	1	
Start Education	1	
Exam Period	1 2	
Course Language	Dutch English	
Expected prior knowledge	See the requirements of the specific MSc programme students are applying for.	
Course Contents	- Systems of linear equations, elementary row-operations, (reduced) echelon form - Vector equations, spans - Solution sets of (non)homogeneous systems of linear equations - Linear independence - Linear transformations and standard matrices - Matrix algebra (sum, product), inverse of a matrix - Subspaces in $\mathbb{R}^n$, column space and null space - Basis and Dimension - Determinants - Eigenvalues and eigenvectors - Diagonalization	
Study Goals	After successfully completing the course you will be able to: - solve systems of linear equations. - identify if a system of linear equations is solvable, and if the solution is unique. - show the equivalence between a vector equation, a matrix equation and a system of linear equations. - give a geometric description of solution sets of vector equations. - determine the linear (in)dependence of a set of vectors and identify the (geometric) properties of linear dependence. - identify if a transformation is linear and determine the standard matrix of a linear transformation. - perform matrix operations (sum, scalar multiple, multiplication, transpose) and describe the law-like properties of matrix multiplication and apply these properties. - describe the properties of invertible matrices, determine the inverse of a non-singular matrix and apply these topics. - give definitions of subspace, column space and null space of a matrix and determine a basis for a subspace. - describe and apply the concept of dimension of a linear subspace, rank of a matrix and the rank theorem. - determine the determinant of a matrix by applying the properties of a determinant. - apply the properties of determinants (product, transpose, inverse). - determine the eigenvalues and eigenvectors of a matrix. - determine the algebraic and geometric multiplicity of the eigenvalues of a matrix. - determine if a matrix is diagonalizable and if so, determine a diagonalization of the matrix. - analyze the case of complex eigenvalues and eigenvectors.	
Education Method	Lectures, 4 hours per week (2x2)	
Literature and Study Materials	- Book: David C. Lay, Steven R. Lay, Judi J. McDonald, Linear Algebra and its Applications, Sixth edition, Global Edition, ISBN-13: 978-1292351216. - Slides on Brightspace. - Prelecture videos. - Online homework assignments (Grasple). - Old exams on Brightspace.	
Books	David C. Lay, Steven R. Lay, Judi J. McDonald, Linear Algebra and its Applications, Sixth edition, Global Edition, ISBN-13: 978-1292351216.	
Assessment	Digital exam (in Grasple) on campus.	
Remarks	Lectures will be in Dutch!	
	Exams will be in offered in Dutch and also in English.	
Co-Instructor	Dr. E. Emsiz	

WI1909TH	Differential Equations	3
Responsible Instructor	Drs. I.A.M. Goddijn	
Contact Hours / Week x/x/x/x	0/4/0/0	
Education Period	2	
Start Education	2	
Exam Period	2 3	
Course Language	Dutch	
Expected prior knowledge	Calculus and Linear Algebra	
Course Contents	Linear differential Equations, Systems of first order, linear and not-linear differential equations, Partial differential equations and Fourier series.	
Study Goals	Learning a number of mathematical techniques necessary for solving various technical-physical model equations.	
Education Method	Colstruction	
Books	Elementairy Differential Equations and Boundary Value Problems, Global Edition ISBN-13: 978-1-119-38287-4 (preferable) or Elementairy Differential Equations and Boundary Value Problems, International Adaptation ISBN-13: 978-1-119-82051-2	
Assessment	Exam with open questions. Due to circumstances (such as Covid-19) this can become an online exam, even in a different format. In case of insufficient results a repair option may exist in accordance with Article 2, Examination requirements, Clause 4, of the Implementation Regulations 2023-2024.	
Permitted Materials during Tests	Announced during lectures and on Brightspace	
Co-Instructor	Dr.ir. Z.J.G. Gromotka
